Rick,

Thank you for taking the time to speak with me this morning on the phone. Since our conversation, I have had several others with some of our Homeowner members and can confirm that we have no intentions or desire to repair the dam.

With that said, [redacted] to provide me with the path to obtain the current regulations for [redacted] the dam?

Thank you,
Cliff Wheaton

I will be in the office today if you need to discuss, but here is my quick response to your questions: The dam is still listed as a Class II (Significant) hazard structure in our database even though it was damaged in 2011 and the gates were subsequently removed. The last thing we have in the file is a letter from 2016 that you sent to Green Acres offering to donate the property. At this point one option you could start with [redacted] r indicating what you plan to do with the [redacted] rward [redacted] or repaired). If the dam is to be officially [redacted] then we can about that process in the best way. If you [redacted] a letter as noted above, please include a few current photos of the dam, the spillway structure, and the upstream impoundment area.
